PROFESSIONAL SUMMARY

Results-driven Data Analyst fresher with hands-on expertise in SQL, Python, Power BI, Tableau, and SSIS-based ETL pipelines. Proven ability to clean, transform, and model datasets to surface actionable business insights. Delivered end-to-end analytics projects in retail sales, e-commerce EDA, and enterprise data integration. Certified by Deloitte Australia (Forage) and Google (Coursera).

TECHNICAL SKILLS

Databases:	SQL Server, MySQL, T-SQL, Stored Procedures, Query Optimisation
BI & Visualisation:	Power BI (DAX, Power Query), Tableau, Microsoft Excel (Pivot Tables, VLOOKUP, charts)
ETL & Integration:	SSIS (SQL Server Integration Services), ETL Pipeline Design,
Programming:	Python (Pandas, NumPy, Matplotlib, Seaborn), Data Cleaning & Transformation
Core Competencies:	Exploratory Data Analysis (EDA), Data Modelling, KPI Reporting, Business Intelligence

PROJECTS

Retail Sales Analysis Dashboard

Excel · MySQL · Power BI

- Designed an end-to-end sales analytics pipeline: ingested raw Excel data into MySQL, wrote optimised SQL queries for aggregation, and built interactive Power BI dashboards.
- Identified top-performing product categories and seasonal trends, enabling data-backed decisions on inventory and promotional strategy.
- Created drill-through Power BI reports with region, time, and category filters for executive-level consumption.

Amazon Product Sales – Exploratory Data Analysis

Python · Pandas · Matplotlib · Seaborn

- Executed full EDA lifecycle on 10,000+ Amazon product records: data ingestion, null-handling, outlier detection, and feature engineering using Pandas.
- Visualised pricing strategy impact on sales rank and correlation between review volume and product ratings using Seaborn heatmaps and scatter plots.
- Documented key findings and statistical summaries in a structured Jupyter notebook for business stakeholder review.

Database SSIS / ETL Pipeline

SSIS · SQL Server

Architected a multi-source ETL pipeline using SSIS with data extraction, cleansing, transformation, and loading into a centralised SQL Server data warehouse.

- Implemented T-SQL stored procedures and control-flow tasks in SSIS to automate scheduling, error handling, and data validation checks.
- Reduced manual data preparation effort by automating the full pipeline, ensuring consistent and auditable data delivery to downstream BI tools.

EDUCATION

B.Tech – Computer Science and Engineering (JNTUH)

2019 – 2023

Nigama Engineering College, Peddapalli -Karimnagar

CERTIFICATIONS

Data Analytics Job Simulation

2026

Deloitte Australia via Forage

Crash Course on Python

2025
